NEWS

Six Terrific Reasons to Use Envirowall for Your Office Partitioning

1. Fast Installation
   Envirowall is a one-step installation process. Since panels are prefinished with vinyl, there is no taping and sanding drywall joints or priming, painting and/or applying wall covering. Projects can be completed in one-third the time required for drywall projects.

2. Cost Effective
   Envirowall prefinished panels eliminate the extra costs associated with conventional drywall finishing of field applied wall covering.

3. Reusable
   Envirowall partitions are demountable. Future renovations will see a high reusability factor for Envirowall panels.

4. Less Disruption
   The quick and clean installation associated with Envirowall partitions makes it less obtrusive and disruptive for any future renovations.

5. Trade Shortages
   The economy sometimes results in shortages of drywall tapers, board men, and painters. Envirowall partitions require only one trade to install. Your project will be completed faster and on time.

6. Environmentally Friendly
   Envirowall panels are reusable and manufactured from recycled products making them a more responsible environmental choice than using drywall and paint.
